

Universal column: OnePole

This versatile column can be delivered with brackets to hold one, two, three or even four charging stations. It's possible to mount a lot of different brands of charging stations to this column. You may choose to add an optional spotlight or even a small rooftop on top of the column. Pluginvest offers you this stylish, but most of all, practical solution for mounting a charging station at home or multiple charging stations for your corporate parking lot. Moreover, this column is made of sturdy aluminium that's even salt water resistant. Suitable for all weather conditions!

The clean, elegant Scandinavian design is combined with its leading Norwegian quality. With the availability of many personalisations, this column is greatly versatile. Designed and produced on the West-Coast of Norway. Installed all over Belgium by Pluginvest.

Easily charged.
